OPERATIONS CENTER

November 8, 1962

At 10:00 a.m., Mr. Burgoon reported from the NMCC as follows:

1. 6 Soviet ships departed Cuba yesterday. They will be inspected by our naval ships pulling alongside, and possibly by helicopters hovering over them.
2. There are two U-2 and 6 low-level flights over Cuba scheduled for today. The low-level flights will not abort if FRUIT SET radar tracking is discovered.
3. GREY WOLF operation is being considered by JCS. This will involve, if a low-level flight is determined to be missing or over-due, the sending of another flight over same area, escorted by one fighter aircraft for protection.
